

Dr. habil. Stefanie Eiden studied chemistry at the University of Hanover and received her diploma in 1990. Then she moved to the University of Konstanz, where she received her doctorate in 1994 in the field of solid-state chemistry. In 2004 she habilitated in the field of inorganic chemistry at the University of Konstanz. From October 2005 to 2015, she worked at Bayer Technology Service GmbH as a project manager in the field of product and process research. In 2015, she moved to Covestro, where she worked for example in process research for electrolysis processes. For 4 years she has been globally responsible in the field of circular economy for all activities related to pyrolysis.
