

Dr. Abby Patterson, Boehringer Ingelheim Animal Health USA, Inc.

Dr. Abby Patterson is an Associate Director of Viral Vaccine Research at Boehringer Ingelheim Animal Health USA, Inc. where she ensures a robust global swine biologics research pipeline by identifying and evaluating new vaccine concepts, developing strategic project plans, leading cross-functional teams, and establishing partnerships with external industry and academic key opinion leaders. She is a veterinarian by training with a MS in Production Animal Medicine and a PhD in Veterinary Microbiology and Preventative Medicine. With 10+ years' experience in developing strategies for veterinary vaccine product development and leading cross-functional teams to deliver results, she is a researcher with a passion for pigs and emerging viral diseases.
