

**Bastian Brand** has been lecturer in nanotechnology and functional surfaces at the Zurich University of Applied Sciences in Switzerland since October 2020. Before joining ZHAW he worked at Metrohm international headquarters in Switzerland as chromatography column development project manager and technical head of column development. His research focus is on surface functionalization and porous polymers for various applications including chromatography.

Bastian Brand completed his master's degree in chemical and bioengineering in 2010 at ETH Zurich. He carried out his PhD in the group of Prof. Morbidelli at the Institute for Chemical and Bioengineering at ETH Zurich from 2010-2014.
