

**Hadi Mohammadi** is the leader of the US Advanced Materials team at Braskem, with over a decade of experience in the production and application development of polymers.

Hadi holds a PhD in Chemistry from Virginia Tech. He began his journey at Braskem by specializing in the design and production of new polyethylene (PE) and PE-based copolymers through high-pressure polymerization processes. Over the years, Hadi has served as a principal investigator on several industrial projects, fostering collaborations with universities and industry partners alike.

Currently, Hadi leads a team of specialists dedicated to the development of novel polymers and technologies, driving innovation and shaping the future of materials.
