

Songbo He is a professor at the Dalian National Laboratory for Clean Energy, Dalian Institute of Chemical Physics (DICP), Chinese Academy of Sciences, and leads the Environmental Catalysis Engineering group. He earned his Ph.D. in Chemical Engineering/Industrial Catalysis from DICP in 2009 and a second Ph.D. in Chemical Engineering/Sustainable Catalysis from the University of Groningen, The Netherlands, in 2022. His research group focuses on chemocatalytic recycling of lignocellulosic biomass and end-of-life plastics into renewable fuels and chemicals using sustainable catalytic techniques such as *ex-situ* catalytic pyrolysis, hydrogenation, and oxidation, at various technology readiness levels (TRLs 2-6).
